“ */ Hi Joseph. Some people do enjoy doing steret photography with a long zoom lens, and I imagine it must be a little less scary to do it that way but then there are others who enjoy a short focal length, so the viewpoint is more natural, and they can get right in the thick of the action'. It may also freak some people out if they saw someone with a really long lens taking surreptious photos of them ! It's all food for thought.*
